Reflections:

Answer the following:

1. What do you think we should look for in choosing the best distribution between Debian and Red Hat Linux distributions?

- So when choosing between Debian and Red Hat Linux distributions for me we should consider the purpose of the system, ease of use, software compatibility, security, stability, and the long term support.

2. What are the main differences between Debian and Red Hat Linux distributions?

- So the main difference between Debian and Red Hat Linux is their target audience and package management system. Debian is community developed, free, and uses APT with the deb packages. It is known for its stability and large software repository.

2. ANSWERS TO SUPPLEMENTAL ACTIVITY

Copy and paste the questions from the lab and include your answers after.
